PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building backend systems in Java and Spring Boot, specializing in microservices, REST APIs, and cloud-based order management platforms on GCP.

TECHNICAL SKILLS

Languages: Java, SQL, Python (basics)
Core Concepts: Object-Oriented Programming(OOP), SDLC, Microservices, REST APIs,
Frameworks & Databases: Spring Boot, Junit, PostgreSQL, MS SQL Server, MongoDB, MySQL, Oracle, Kafka
Cloud & Monitoring: Google Cloud Platform (Pub/Sub, Cloud Scheduler, Workloads), Datadog, Elasticsearch, Kibana
Tools & Methodologies: Git, IntelliJ, Eclipse, VS Code, Postman, Agile/Scrum

EXPERIENCE

Software Engineer Aug 2025 – Present
Ingram Micro Platform Technology India Private Limited *Mumbai, Maharashtra*

X4C / X4A – Order Status & Tracking (Java, Spring Boot, Microservices) | Dec 2024 – Present

- Enhanced new REST PO APIs (CRUD), extended the API layer with new fields, and resolved B2B bugs and production incidents across the engine layer.
- Resolved vendor issues across the top 10 vendors (Lenovo, Apple, Cisco and others) and enhanced Lenovo tracking details in the Orders module.
- Delivered reporting enhancements, including a single unified query across the Open Order, Last Day Shipment, and All Order reports, plus UAT fixes and translation fixes.
- Contributed to vendor integration for onboarding new vendors in the EMEA region.
- Raised JUnit unit test coverage for OST repositories to 80%.

X4V – Xvantage for Vendors, Orders Module (Java, Spring Boot) | May 2025 – Present

- Led the on-prem to GCP migration for X4V using OST databases, supported the Apigee to Akamai URL transition.
- Optimized API and list-page performance, resolved data mismatches, and delivered tracking, pre-shipment, and ASN enhancements.
- Enhanced Excel download functionality for multiple countries, updated Elastic/Kibana templates and indexes, worked with GCP Pub/Sub, Datadog, and Cloud Scheduler jobs.

Trainee Software Developer Jul 2024 – Jul 2025
Ingram Micro Platform Technology India Private Limited *Mumbai, Maharashtra*

- Contributed to a report harmonization (ETL) project converting semi-structured text reports into structured Excel (.xlsx) files.
- Developed Python scripts (automated via Task Scheduler) to process business reports (PUP, ARP, APP, etc.) across India and China regions.

PERSONAL PROJECTS

StockLock – Concurrent Inventory Reservation System Java, Spring Boot, PostgreSQL, React

- Built an inventory API that prevents two customers from reserving the last item, with product stock and reservation records.
- Implemented transactional reserve and release APIs using database transactions and row-level locking to prevent overselling.
- Recorded reservation history and demonstrated concurrent requests competing for limited stock.

Expense Tracker System MongoDB, React, Express, Node.js

- Built an expense tracker with add/edit/delete, weekly and monthly analysis, and a category-wise income vs. expense dashboard.

Tour and Travel Hiking Website PHP, MySQL, HTML, CSS, JavaScript

- Developed a website showcasing tourism packages, adventure activities, and travel essentials for hikers.

Gemini Clone React, Gemini API

- Built a Gemini AI clone using the Gemini 1.5 Flash model with a React frontend.

PUBLICATIONS

Harvestify: ML-Based Tool for Home Gardening & Farming Apr 2024

- Collaborated with a team of four to develop an ML-based tool for home gardening and farming; published at the 2nd International Conference on Advances in Technology and Management (ICATM-2024), AC Patil College of Engineering. View publication

EDUCATION

SIES Graduate School of Technology Jul 2020 – Mar 2024

Bachelor of Engineering in Information Technology (Honours in Blockchain) | CGPA: 9.2/10 *Navi Mumbai, Maharashtra*

M.H. Junior College Jul 2018 – Mar 2020

HSC – Science | 80% *Thane, Maharashtra*
